I submit this order of trees through the Benton Soil and Water Conservation District. I understand that planting stock not surviving cannot be replaced by the District and that the District does not guarantee survival. I understand that the above trees ordered cannot be used for ornamental purposes nor can they be resold, given away, or be removed with roots attached. I understand that the trees ordered are for conservation purposes only; such as wildlife, erosion control, windbreaks or shelterbelts. The District reserves the right to substitute stock.

SIGNATURE _____

DATE _____

We anticipate the trees to arrive the last week of April or the first week of May. You will receive a notice in the mail with pick-up dates and times.
Orders will be taken until supplies are exhausted.
Trees not picked up during scheduled pick-up dates will be subjected to a \$20 per day storage fee

WE OFFER FREE TECHNICAL ASSISTANCE FOR CONSERVATION TREE PLANTINGS

BENTON SOIL & WATER CONSERVATION DISTRICT

* - Native Tree and Shrub Information

CONIFEROUS

Red Cedar

The red cedar is a small, hard tree. It grows 20 to 60 feet tall. It provides food for wildlife, habitat and good in windbreaks. Shade-intolerant: slow growing; long lived. Plant on well drained soils.

White Cedar

25 to 50 ft. Prefers moist rich soils, somewhat tolerant to wet soils. Will tolerate light shade but will fill out with more shade. Fruit is a small (3/8) light brown cone. Shade tolerant; slow growing; moderately long lived.

Balsam Fir

40 to 75 ft. Flattened needles, shiny above and silvery-blue below, 3/4 inch long, blunt or notched at end. Ruffed, spruce, and sharptail grouse eat the buds and needles. Very shade tolerant; slow growing; intermediate lived.

Jack Pine

25 to 40 ft. It will survive on the driest soils in the state, and makes rapid growth during the first 10 to 15 years. The small cones are about 1-1/2 inches long, often strongly curved. Very shade tolerant; fast growing.

Norway Pine

40 to 60 ft. Lives 200-300 yrs. Prefers light acid sandy soils. Will grow in poorer sites than White Pine but not as poor as Jack Pine. Shade intolerant; moderately fast growing; long lived. Minnesota State Tree.

White Pine

Rapid growing: 40 to 70 ft. Lives 200 to 300 yrs. Does well in a variety of soils. Fair for wildlife and farmstead shelterbelts. Good in windbreaks. Intermediate shade tolerance; fast growing; long lived.

Black Spruce

Small to medium tree, 25 to 30 ft. Shade-tolerant; moderately slow-growing; moderately long lived. Sub-species of the white spruce. Common marsh and bog species.

White Spruce

40 to 60 ft. Prefers moist, sandy loam soils, but will tolerate more dry conditions. Quite adaptable to difficult conditions such as heat, cold and drought. Good in windbreaks. Winter cover for many species.

Black Hills Spruce

40 to 80 ft. Prefers moist, sandy loam soils. Quite adaptable to difficult conditions such as heat, cold and drought. Good in windbreaks. Winter cover for many species. Shade tolerant; moderately slow growing.

Tamarack

Grows 40 to 60 ft. Although most commonly found in swamps and muskegs, it will grow on well-drained upland sites: can tolerate a wide range of soil moisture conditions. Shade intolerant; fast growing; long lived.

DECIDUOUS

Green Ash

Moderate growth; up to 40 to 60 ft. Lives 100-150 yrs. Prefers wide range of soils. Tolerates flooding. Good hardwood species for farmstead shelterbelts and windbreaks. Moderately shade tolerant; fast growing.

Paper Birch

40 to 60 ft. It is a showy tree in the woods with its white bark. Paper birch occurs on moist wooded slopes and along streams. Shade intolerant; fast-growing; short lived.

Linden (Basswood)

50 to 75 ft. A large, wide-spreading, round-topped tree with dense foliage. It is found on cool, moist soils in coves and on north and east slopes. Shade tolerant; moderately slow growing; long lived.

Red Maple

Medium to rapid growth; up to 40 to 70 ft. Prefers slightly acid sandy loams. Not recommended for farmstead shelterbelts. Intermediate shade tolerant; moderately fast growing and long lived.

Silver Maple

Fast growing large tree; 40 to 70 ft. Needs full sun. Tolerates a wide range of soil types. Prefers a deep, moist soil but will grow in poor soil. Moderately shade tolerant; fast growing; moderately short lived. Very flood tolerant.

Sugar Maple

Slow growing; up to 40 to 70 ft. Lives 75-150+ yrs. Prefers loams & clay loams; shorter lived on sandy soils. Very shade tolerant; slow growing.

Bur Oak

Grows 50 to 80 ft. Extremely adaptable to a wide range of soils and conditions. Good resistance to oak wilt. Intermediate shade tolerant; slow growing; long lived.

DECIDUOUS (cont'd)

Pin Oak

Grows 40 to 60 ft. tall and can reach two feet in diameter. Often found on dry uplands and sandy soils. Shade intolerant; moderately fast growing; moderately long lived. Susceptible to oak wilt.

Red Oak

60 to 70 ft. It is found on a variety of soils, except on the drier clay uplands. It prefers moist, rich soils on north, east or north-east exposures. Moderately shade tolerant; fast growing. Susceptible to oak wilt.

White Oak

50 to 70 ft. and 3 to 4 ft in diameter. Grows on a wide variety of soils, but usually on upland clay soils. Intermediate in shade tolerance; moderately slow growing; very long lived; resistance to oak wilt.

Black Walnut

50 to 70 ft. Large, open crown; trunk up to 36" diameter. Does well in rich, well drained lowland sites. Shade intolerant; fast growing; moderately long lived.

SMALL TREES

Common Chokecherry

20 to 30 ft. Prefers rich loamy, well drained soil. Fruit dark purple/black, edible-tart. Excellent for birds. Moderately shade tolerant; fast growing; short lived.

American Plum

10 to 30 ft. Lives to 35-65 yrs. Prefers loam soils. White, fragrant flowers. 1"-11/2" plums ripening in Aug. to Sept.; edible and used for jellies. Good for wildlife. Shade intolerant; moderately fast growing; medium lifespan.

Juneberry

6 to 20 ft. The Juneberry is usually shrub-like. The tree flowers in the early spring and has beautiful, delicate white flowers. Shade tolerant; slow growing; medium life expectancy. Edible fruit.

Flame Willow

10 to 20 ft. Dense branching and compact oval form. Bark is orange-red in winter. Good for wildlife. Sand through clay. Moderately shade tolerant; fast growing; short lived.

Nannyberry

10 to 12 ft. A large native tree-like shrub. Attractive for its shiny foliage, red fall color and fruit display. Good for wildlife. Loam through clay. Full sun to partial shade; medium growth rate; short lived.

SHRUBS

Sand Cherry

3 to 6 ft. Prefers loamy soils. High wildlife value. Shade intolerant; medium growth rate; short lived.

Black Chokeberry

3 to 6 ft. Adapted to many soil textures, including poorer sites, but prefers wet site. Leaves turn a wine red color in fall. High wildlife value. Moderately shade tolerant; medium to fast growing; short lived.

American Cranberrybush

8 to 12 ft. On well drained, moist cool soils. White, flat-top clusters of flowers in June turn to scarlet red fruit that drop in clusters. Fruit edible & used for jellies if not taken by birds. Shade tolerant; moderately fast growing; short lived

Gray Dogwood

5 to 15 ft. Tolerates a wide variety of soils. Does well in wet areas and is flood tolerant. Small white flows turn to white berries. Good for wildlife.

Redosier Dogwood

5 to 15 ft. Tolerates a wide variety of soils. Small white flows turn to white berries. Good for wildlife.

False Indigo

6 to 12 ft. A shrub that grows right at the edge of lakes and streams on sandy or silty banks. It tolerates some flooding. The delicate lacy foliage is very attractive and the long clusters of blue flowers are conspicuous in the summer. Shade intolerant; fast growing; short lived.

Hazelnut

6 to 12 ft. Tolerates a wide variety of soils. Forms clumps or thickets. Good for wildlife. Partial shade, medium growth rate; medium lifespan.

Common Ninebark

8 to 10 ft. Prefers sandy loam through clay. Needs full sun. White flowers in spring are excellent nectar source and fruits eaten by many species of birds.

WILDLIFE PACKET

30 trees (5 of each species)

Black Chokeberry, American Cranberrybush, American Plum, Bur Oak, White Spruce and White Cedar
